

Orange County Sheriff's Office

Operation Overview

Deputy First Class Brandon Coates Homicide

March 8, 2010

Sheriff Jerry L. Demings

Message from Sheriff Jerry L. Demings
Deputy Brandon Coates Homicide Incident 12/8/10
After Action Report
March 8, 2011

To All Concerned:

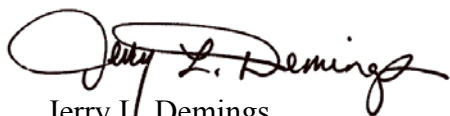

On December 8, 2010, while working on duty and in uniform, Deputy Brandon Coates was tragically killed by an armed assailant, Brandon Lyals, during a routine traffic stop in the area of 45th Street and South Orange Blossom Trail in the unincorporated area of Orange County. Numerous law enforcement agencies and the Orange County Fire Rescue Department responded to the call for assistance. A list of responding agencies is included in the after action report. The Orange County Sheriff's Office owes a debt of gratitude to all those who assisted.

Although we may never know precisely all the details of what occurred, it is certain that a lone gunman took the life of Deputy Coates and subsequently took his own life in the moments immediately following the encounter. Given these facts, it is necessary to further review the agency's response to the incident in order to determine and document lessons learned. Good agencies are not fearful of critical review, which is a requirement for agencies that pursue excellence.

Consequently, as Sheriff, I directed that an after action report be written to memorialize the events surrounding the incident. Captain Tom Foster was tasked with preparing the report and he is commended for his efforts. This report focuses less on the actions of Deputy Coates, but more on the overall Sheriff's Office response to the incident. The report will be used in policy review, future training decisions, incident command discussions and operational decision-making in critical incidents.

I want to personally thank all those who contributed to writing the report and remind everyone that together we will make a great agency even better.

Respectfully submitted,

A handwritten signature in black ink, reading "Jerry L. Demings". The signature is fluid and cursive, with a large initial "J" and "D".

Jerry L. Demings
Orange County Sheriff

Orange County Sheriff's Office

After Action Report Summary

Deputy First Class Brandon Coates Homicide

December 8, 2010

After Action Review

Origin

On the evening of December 8, 2010, Deputy First Class Brandon Coates was working as a member of the Tactical Anti-Crime Squad in the South Orange Blossom Trail area of Orange County, Florida. His TAC squad was conducting self-initiated law enforcement activity and operating on a talk-group not monitored by the Communications Section; however, the talk-group was monitored by a supervisor. At approximately 2027 hours, DFC Coates conducted a traffic stop on a white pick up truck near 1414 45th Street, Orlando. Sometime during this traffic stop, DFC Coates was attacked and fatally shot. Numerous witnesses called 911 reporting that a deputy had been shot in the area of 45th Street and S.O.B.T. DFC Coates was located by first responders and treated at the scene by Orange County Fire Rescue. DFC Coates was transported to ORMC where he was pronounced deceased. After a thorough search, suspect Brandon Lyals was found deceased of an apparent self-inflicted gunshot.

Key Initial Call Response Times (Not all inclusive):

2035 Orange County Fire Department notified and enroute. (RS)

2035 Call verbally dispatched (RS)

2035 911 Call received advising that at 5208 Via Hacienda a black male abandoned a white truck in front of that location. The truck matches the Suspect vehicle description. (Call taker treats as suspicious vehicle because she has no knowledge of the shooting). (RS)

2036 Units showed assigned in CAD. (CAD)

2036 Multiple Patrol Units responding, 10-33 traffic called. (RS)

2037 Unit 142 Deputy Thomas McIntosh on scene, suspects in a white truck, appears to be a TAC unit, white dodge truck is GOA. Confirmed Deputy down, possible S-7 (deceased). (RS)

2037 Signal-43 (need help) put out on Intercity and OCSO talk groups, Signal-43 Sector 4, Holden and OBT, Officer shot. (RS)

2037 Chase notified. (CAD) Chase and K9 told to change to channel 4; K916 is en route (RS)

2038 – 2040 Multiple reports of white truck observed leaving area. (RS)

2039 First responders put out the possible suspect vehicle is a white, Chevrolet, pick up truck, 308YTD, it is a rental. (RS)

2039 Metro 5 talk group patched for other responding agencies. (RS)

2040 342 arrives and advises rescue 50 is also on scene. (RS)

2040 Call taker enters info regarding abandoned Vehicle at 5208 Via Hacienda into call. (CAD)

2042 Dispatcher advises we are having computer problems. (RS)

2043 Units responding and establishing and extended perimeter in the area of Via Hacienda and Huntington on the Green complexes based on Suspect information obtained from TAC 45 vehicle # 1099. (RS)

2043 Notified on Intercity that units from Orlando PD, Florida Highway Patrol, Winter Park PD and Maitland PD are responding (CAD)

2044 Channel 2 Dispatcher advises computer has locked up. (RS)

2046 Update on truck put out on Intercity (description and tag) (RS)

2046 FHP asks for update on direction of travel (RS)

2049 Homicide notified of incident

2050 Dispatcher advises possible suspect vehicle at Via Hacienda Dr. (RS)

2050-2117 Command Staff notified of incident

2055 Estimated time of MDS crash for several minutes due to overload.

2058 Report of suspect last seen running in area of Huntington on the Green. (RS and CAD)

2059 Dispatch advises FHP of suspect's name and address (RS)

2102 Forensics notified of incident

2111 HRD notified of incident.

2116 PIO notified of incident

2121 CIMT notified of incident

2124 Report of a possible suspect located in wooded area near Huntington on the Green. Suspect is Signal 7 (deceased). Suspect matches preliminary description of Suspect information gathered from original scene. (RS on S4S talk group)

2226 Requested a FCIC/NCIC Transaction Archive Report (TAR) showing DFC Coates Teletype activity from FDLE.

2223 Beginning to break down and release assisting agencies personnel.

2240 Bloodhounds complete tracks, no further ongoing tactical operations regarding additional suspects.

December 9, 2010

1146 Crime Scene and crime scene security is released per Criminal Investigation Division...

1146 End of operations.

Uniform Patrol Response

On December 8, 2010, at 2036 hours, multiple patrol units respond to the area and at 2037 hours, Sector IV Deputy Thomas McIntosh arrives on scene and confirms a deputy has been shot.

As additional units arrive on scene, first responders broadcast possible suspect vehicle description, secured the crime scene and established a large extended perimeter in an effort to contain the suspect.

- * A primary command post was established by Sector IV Patrol Lieutenant Joe Picanzo in the rear parking lot of the Orange Blossom Center, just west of the intersection of Nashville Ave. and 45th Street. Additionally, a staging area was set up for resource tracking and arriving law enforcement personnel.

Major Ron Stucker arrived on scene and further assisted with the organization of Command Post by establishing two sections; a Tactical and Investigative Command Post.

- * A secondary command post was established by Watch Commander Lieutenant Rick Luckey at Honour Rd. and Texas Ave. Chief Deputy Matt Weathersby arrived on scene and assisted with advanced organization of the overall Command Post and is designated Incident Commander.

Upon arrival the Seven Critical Tasks were completed, and listed below.

- ASSESS THE SITUATION
- IDENTIFY THE "DANGER ZONE"
- ESTABLISH INNER PERIMETER
- ESTABLISH OUTER PERIMETER
- ESTABLISH INCIDENT COMMAND POST
- ESTABLISH STAGING AREA
- REQUEST ADDITIONAL RESOURCES

In addition to the Seven Critical Tasks, the following were also activated:

- Incident Command System Protocols - Command Board with ICS organizational chart.
- K-9 Group was established
 - Significant part of the search
 - Had a scribe assigned to Corporal Rick Miller, Group Leader.
- OCFRD on scene.
- Canvas of immediate area of 45th Street by initial Uniform Patrol responders.
- Expanded staging area established.
- Expanded PIO/Media area established.

- Criminal Investigative Division component organized.
- Casualty Benefits Team Captain Larry Krantz.
- CIMT activated.
- SWAT activated and staged at the Sector IV Substation.
- OPD and FHP had units deployed on the perimeter
 - Representatives from each agency identified and respond to CP
 - Said personnel briefed on incident status and remain at CP
- Constant coordination of intelligence information shared between Chief Deputy Matt Weathersby and Major Ron Stucker ensuring all efforts were exhausted.

At 2040 hours, Communications Center received a 911 call giving the possible location of the suspect vehicle. Patrol units responded to the area and the suspect vehicle was located, abandoned within the extended perimeter, near 5208 Via Hacienda Circle. Additionally, a possible suspect was seen fleeing in the area of Huntington on the Green Condominium Complex.

At 2125 hours, the subsequent search of the inner perimeter located a deceased black male matching the description of the suspect. The deceased male had what appeared to be a self-inflicted gunshot wound. This subject was in possession of a handgun that was consistent with the type of firearm used in the homicide of DFC Coates.

Criminal Investigations personnel verified that information gathered at the original crime scene was related to the deceased suspect.

The tactical response to this incident was terminated when there appeared to be no further intelligence information indicating there were additional suspects. The extended perimeter was reduced to one of crime scene preservation.

Communication Center Response

Communications first became aware of this incident at approximately 2033 hours when a 911 caller advised that a deputy had been shot and was lying on the ground by his car. Several other 911 calls with similar information soon followed. Each 911 Operator started questioning the callers for more information and transferred them to the Fire Department for a medical response. A concern was raised about the timeliness of the transfer of the 911 information and was referred for internal review. Units were dispatched to the scene. Other agencies were notified via Intercity and started to respond. At approximately the same time, dispatchers started to experience difficulty with the Computer Aided Dispatch (CAD) system and deputies also experienced problems with their mobile computers. There was a rapid and continuous increase in manpower. Soon almost 300 responders from numerous law enforcement agencies were in

the area. Suspect information was obtained by the first units on the scene and broadcast over the radio.

It was later determined by Information Management Services (IMS) that the outage was caused by three separate CAD server events that were all related to the incident.

The primary contributing factor was a problem with the way the Tiburon software handled messages from the CAD server to the Mobile Comm units that were assigned as backup units to the call. A secondary factor was deputies not assigned to the call viewing the call notes on their Mobile Comm. The third contributing factor was a flood of deputies that were not logged on the Mobile Comm, logging on to view the call notes. These three actions combined to cause an overload on the system which could only be resolved by restarting the Tiburon application.

Criminal Investigations Response

The Criminal Investigations Division responded with approximately 49 detectives and 4 crime scene investigators after being notified by Captain Mike Osborne at approximately 2040 hours. This manpower was on scene within a half hour of Deputy First Class Coates being shot. The rapid and sizeable response by the detectives enabled intelligence to be obtained quickly and the identity and number of suspects was established in a timely manner.

On 12-09-2010, at 1146 hours, Criminal Investigations concluded their crime scene investigation. The crime scenes, as well as all perimeter security, were released by CID concluding operations.

Public Information Officer Response

OCSO Media Relations was called to the scene of incident to direct information dissemination to media, both local and statewide. The on-call PIO was notified and set the notification process in motion. Within a short time, the entire PIO team was activated and the communication process set in motion.

Casualty Benefits Team / Casualty Incident Stress Management (CBT/CISM)

CISM Team Command responded to the hospital for an initial assessment of the first responders, affected non-first responders and affected General Staff. CISM Team Members responded to the Communications Center to assess and assist on-duty Communications Center personnel.

On Thursday, December 9, 2010, the TAC Unit met off-site in an informal setting to allow the CISM Team Command to offer coping strategies while TAC Unit Command briefed all on the circumstances of Brandon's death.

A formal debriefing for first responders was held on Sunday, December 12, 2010 with a Licensed Mental Health Provider, CISM Team Command and Team Members. This debriefing was completed utilizing the ICISF Mitchell Model, which is a universally accepted practice

model for critical incidents. Additionally, Uniform Patrol Division Sector 3 A-Side personnel were debriefed by the Division Commander, Captain, Lieutenant and CISM Co-Commander.

A follow-up session with CISM Command and Team Members and all Communications Center personnel on duty at the time of Brandon's death was held to again assess and assist with any compelling issues. Further follow-up with Licensed Mental Health Professionals is continuing. CISM Staff attended Brandon's viewing and funeral in order to continually assess and spend time with the affected personnel.

In addition, Agency Chaplains responded to the hospital to assist and were involved in the funeral arrangements.

Lessons Learned / Recommendations

Uniform Patrol

Lessons Learned

- It is recommended that traffic stops shall be conducted on a monitored communications radio channel in the respective sectors. However, due to sector calls for service and high volume of radio traffic on the primary communications radio channel, consideration should be given regarding an alternate monitored channel for identified specialty units.
- In this case, the immediate evaluation of the crime scene and evidence that was present was essential in identifying a possible location and suspect. First responders should continue to balance crime scene preservation with gathering active intelligence information that can be utilized in apprehending an active shooter or at-large suspect.
- Due to a large number of personnel logging into the call or signing on to the system, data overload occurred and shut down the data terminals during this critical incident.
- In the "time-line," it indicated that the Radio Shop verified that the "Freedom Software" was *wrong* and it was DFC Coates responding with a 10-4 and not Cpl. DeGrilla.

Planned Improvements

- Communications Center has established and assigned a dispatcher to monitor a TAC channel during the shift our Tactical Anti-Crime units are operational. Additionally, patrol personnel and supervisors shall review and enforce the agency's traffic enforcement policy.

- The Orange County Sheriff's Office IMS is actively addressing the Computer Aided Dispatch (CAD) issue and changes are forthcoming.
- The "Freedom Software" is being replaced within the next few months as the new radio system is continuing to be installed.

Actions Taken

- Communications Center has established and assigned a dispatcher to monitor a TAC channel during the shift. Tactical Anti-Crime units are operational. Additionally, patrol personnel and supervisors shall review and enforce the agency's traffic enforcement policy.
- The agency will continue to train on the balancing of crime scene preservation and intelligence gathering at scenes of acute crimes. No further action is required as the responding deputies performed as expected.

Command Post

Lessons Learned

- The main command post with the HRIC (Chief Deputy Matt Weathersby) was co-located with the Tactical Operations Command Post. A liaison with the Orange County Fire Department should have been staged at the main command post.
- The establishment of a separate primary command post site should have been established. The High Risk Incident Commander (HRIC) could have commanded the Tactical Operations Command Post and Investigative Command Post from this location.
- The Mobile Command Post (MCP) may have assisted, and should be considered on future callouts.

Planned Improvement

- Chief Deputy Matt Weathersby will be addressing these lessons learned by sharing this information to other HRIC personnel and implementing training.
- Major David Black will initiate additional Incident Command System (ICS) training for the Uniform Patrol Division.
- The Mobile Command Post (MCP) should be considered on future callouts.

Actions Taken

- Chief Deputy Matt Weathersby addressed these lessons learned by sharing this information with other HRIC personnel.
- Major David Black has initiated additional Incident Command System (ICS) training for the Uniform Patrol Division.

Communications Center

Lessons Learned

- 911 Operators and Dispatchers demonstrated a lack of ability to cope with critical incidents of this type and would benefit by providing wide-ranging scenario training drills resulting in a more consistent response.
- Communications received numerous calls from inside and outside the agency asking for the name and status of the deputy that had been shot.
- During a catastrophic event, employees personally affected because of relationships should be identified and triaged away from the work area.
- The Tiburon Computer Aided Dispatch (CAD) system failed because of a sudden increase in mobile computer traffic related to the response to this incident. 911 Operators and Dispatchers depend upon CAD; deputies rely on their mobile computers.
- Review Communication Center's practice regarding 911 calls and transfers to dispatch.

Planned Improvements

- Improve personnel's response to critical incidents through scenario based training, to include transferring 911 calls to dispatch.
- Communications should refer all media inquiries to the Public Information Office.
- Agency personnel should refrain from calling the Communications Center during major incidents and instead seek direction from their chain of command.
- Communications should develop protocols to manage the impact on staff. TVs normally tuned to news channels should be turned off.
- Efforts should continually be made to avoid critical computer system failures. The agency is working with Tiburon to prevent this from happening again. (See IMS planned improvements).

Actions Taken

- The Communications Section's management team is in the process of developing and implementing additional scenario training for 911 operators, specifically for emergencies involving agency personnel. Training is also being developed for the Communications Center to implement ICS protocols specific to their required tasks during critical incidents. Updates on the implementation of the training will be provided at intervals directed by the division command.
- Direction has been given that televisions will not be turned on during critical incidents.
- As part of the implementation of ICS at the Communications Center, during critical incidents, a person will be tasked with personnel evaluation for employees that may need immediate relief.
- Communications supervisors have been directed to refer all media or extra-agency inquiries to the PIO and agency employees to their respective chain of command for information during a critical incident. This task will be delegated as part of the ICS protocols.
- A review of the transfer of 911 calls to dispatch has been conducted.
- IMS has addressed the software flaw that caused the CAD server to stop processing. See the IMS portion of this report for details.

Information Management System (IMS)

Lessons Learned

- Tiburon identified a flaw in their software.
- Verify the CAD server has kept up with agency growth and is able to handle the workload appropriately.

Planned Improvements

- Tiburon has already taken temporary steps to prevent an overload of the system with CAD backup messages to units assigned to a call as a backup. This temporary fix is in testing and once proven to work properly will be in place until a permanent solution has been developed.
- Tiburon has identified the flaw in their software and has started making the necessary changes to correct the problem. Tiburon has told us they expect a very quick completion.

- IMS has started talks with Tiburon to pull the call notes from the CAD system and place them on a separate server. This will allow IMS to develop a separate application that will allow deputies to view dispatch notes for active calls for service, without logging on the Mobile Comm.

This will eliminate the need for the deputies to view these notes in the Mobile Comm and or log on their Mobile Comm and thus eliminate that extra load on the CAD server.

- IMS is in the process of setting up system monitoring on the CAD server to measure the load on that server. If these results indicate the server load is beyond 25% capacity during a normal work day, IMS will replace the server with a unit that is properly sized for the workload.

Actions Taken

- The temporary patch tested with no issues and has been installed on the production server. The patch worked well during the barricaded suspect call last month at Colonial Dr. 50 and Pine Hills road.
- Tiburon has modified their software so messages sent to backup units no longer will consume the server resources as it did on December 8, 2010. This change has been applied to the test environment and will be tested extensively before it is moved to production.
- Tiburon has been made aware of the importance of providing call notes for use off the CAD server. IMS will continue to work with Tiburon however this will take some time to complete due to the technical problems associated with this change.
- The audit of CAD server indicated that the CAD server is operating, on average, at 60% of its capacity. IMS is working with an IBM provider and Tiburon to replace the server with a unit that will allow us to reduce that usage, on average, to under 50%.

Criminal Investigations Division

Lessons Learned

- The Criminal Investigations Division component of this incident did not designate specific follow-up investigative tasks utilizing the Incident Comm and System (ICS) structure. The flow of information back to the Investigative Command Post could have been more effective.

Planned Improvements

- Managers of the Criminal Investigations Division have met and discussed ensuring the use of the Incident Command System in all large scale investigations. Major McKinley is in the process of upgrading the Lieutenant's vehicles with watch command style equipment so these vehicles can be used as mobile command posts in the future.
- Incident Command training has been scheduled for all Criminal Investigations Division personnel.

Actions Taken

- Sworn personnel within the Criminal Investigations Division attended Incident Command System training on March 1, 2011.
- ICS packages have arrived and have been distributed to all Lieutenants within the Criminal Investigations Division, which will allow them to set up a C.I.D. Command Post during critical events.

Public Information Office

Lessons Learned

- The Orange County Sheriff's Office Media Relations Section has been in place for a number of years and therefore knows exactly what is expected and where each officer will likely be dispatched. In this incident, three scenes called for three Public Information Officers, each one communicating with the other and speaking with one voice (one person only from the PIO team).

Planned Improvement

- When multiple scenes for one incident are involved, the Public Information Officer (PIO) should prioritize which briefing to attend first. If multiple PIO's respond, all should communicate and decide who will be the spokesperson. Subsequently, the designated PIO will then assume responsibility to address and/or release information to the media.

Actions Taken

- PIO personnel were briefed that when responding to high risk incidents, they are required to submit a timeline of media briefings and overview of information released.

Casualty Benefits Team / Casualty Incident Stress Management (CBT/CISM)

Lessons Learned

- Encouraging agency personnel to follow protocol regarding making notifications to the family.
- Maintain Incident Command System (ICS) format of the operation and improve communications and follow-up for all aspects of the team.
- Develop a file of businesses that are willing to provide resources during a line-of-duty death and have that list available to the Casualty Benefits Team (CBT) staff for resource allocation. We spent a lot of time trying to manage the donations being offered.
- Involve the employee's chain of command (Lieutenant or above) in the process to assist the lead Casualty Assistance Officer (CAO) with personnel management and the funeral events.
- Chaplain Liaison needs to follow protocol and make sure Chaplains are sent to areas where agency personnel may benefit from their assistance.

Planned Improvements

- Identify all names of personnel who will fill a specific role on the Casualty Benefits Team and train all assigned personnel for their role.
- Develop a list of businesses that are willing to provide resources before they are needed.
- Train agency personnel during orientation and in annual supervisors training on CBT related issues.
- Coordinate with Homeland Security and develop a Casualty Benefits Operational Guide.
- Make sure we follow protocols established to better respond to a traumatic event involving agency personnel and therefore assist immediately those who need help coping with a tragic issue.
- In order to benefit all agency personnel, a Power Point should be created and posted on the agency Portal.

Actions Taken

- A one (1) week Florida Attorney General's Office Crisis Response training course is scheduled in July 2011 for all CIT, CAO, CBT and CISM personnel. Communication Center personnel will be invited to attend.
- Made contact with Patrol Sector C Captains and offered to conduct presentations during briefing regarding the role of CBT, CAO, CISM, CIT, Advocate Services and the Chaplain program.

Additional Actions Taken Regarding TAC Unit

- Effective December 14, 2010, all Tactical Anti Crime Unit actions are being monitored by the Communications Center with an assigned dispatcher.
- Effective December 14, 2010, all Tactical Anti Crime Unit Deputies will be deployed in two person vehicles when conducting anti-crime details in high crime areas.

In conclusion, this is intended as an overview, summary and lessons learned by the many components of the Orange County Sheriff's Office that responded to the murder of DFC Brandon Coates and is not meant to be all-inclusive. The lessons learned, planned improvements and actions taken were drawn from the documents submitted by the areas involved.

Orange County Sheriff's Office

Uniform Patrol Division

After Action Report

Deputy First Class Brandon Coates Homicide

***1414 45th Street
Orlando, Florida***

December 08, 2010

Executive Summary

On December 8, 2010, Deputy First Class Brandon Coates was working as TAC 45 in the South Orange Blossom Trail area of Orange County, Florida. At approximately 2027 hours, while conducting self initiated activity, he stopped a white Chevrolet pick up truck near 1414 45th Street. DFC Coates contacted the driver of the vehicle, later identified as Brandon Lyals, B/M, 02-21-1981. A physical encounter occurred between DFC Coates and the suspect. DFC Coates deployed his ECD striking the suspect, but the ECD proved to be ineffective. The suspect, who was armed with a handgun, shot DFC Coates and fled from the scene in the Chevrolet truck. According to witnesses, they observed the deputy conversing with the driver of the truck, who was near the front of the deputy's patrol car, later heard gunfire, and then observed the suspect get back into his truck and flee from the area. Numerous witnesses called 911 reporting that a deputy had been shot in the area of 45th Street and S.O.B.T. DFC Coates was located by first responders, he was treated at the scene by Orange County Fire Rescue, and transported to ORMC where he was subsequently pronounced deceased.

First responders established a secure crime scene and a very large extended perimeter in an effort to contain the suspect. A primary command post was established by Lt. Picanzo, Sector IV Patrol, in the rear parking lot of the Orange Blossom Center, just west of the intersection of Nashville Ave. and 45th Street. A staging area was created in the front parking lot of Orange Blossom Center.

The suspect vehicle was located within minutes, abandoned, within the extended perimeter, near 5208 Via Hacienda Circle. A possible suspect was seen fleeing in the area of Huntington on the Green Condominium Complex.

A secondary command post was established by Watch Commander, Lt. Luckey, at Honour Rd. and Texas Ave. An inner perimeter dedicated to confining the suspect was established in the area surrounding Huntington on the Green. The subsequent search of the inner perimeter located a deceased black male matching the description of the suspect. The deceased male had what appeared to be a self inflicted gunshot wound. This subject was in possession of a handgun that is consistent with the type of firearm used in the murder of DFC Coates. Criminal Investigations personnel verified that information gathered at the original crime scene was related to the deceased suspect.

The tactical response to this incident was terminated when there appeared to be no further information indicating additional active suspects. The extended perimeter was reduced to one of crime scene preservation. On 12-09-2010, at 1146 hours, Criminal Investigations concluded their crime scene investigation. The crime scenes, as well as all perimeter security, were released by CID concluding operations.

Incident Overview

The emergency response to the deputy down call was a rapid and continuous increase in manpower. This incident expanded rapidly with over 300 responders from numerous law enforcement agencies and various assignments within the Orange County Sheriff's Office. Incident Command and protocols were initiated immediately and all critical tasks were completed. A sketch of the impacted area was created and displayed at the command post, along with key assignments. All responding units were properly tracked by Resources Tracking under the Planning Section. Communications Section was briefed and informed of the incident along with frequent updates. Responding units were constantly made aware of the suspect information and potential danger zones. An Intelligence component was created to immediately support on-going tactical operations and criminal investigations.

In addition to the Seven Critical Tasks, the following were also activated:

- ICS Protocols.
- OCFRD on scene.
- Canvas of immediate area by initial Uniform Patrol responders.
- Expanded staging area established.
- Expanded PIO/Media area established.
- CID component organized.
- Casualty Benefits Team Captain Larry Krantz.
- CIMT activated.
- SWAT activated per HRIC.

Outcome

The immediate emergency response to this incident resulted in the suspect and the suspect's vehicle being contained within an extended perimeter. Subsequently the suspect was located in a wooded area. Preliminary findings indicate the suspect appeared to have a self-inflicted gunshot wound resulting in his death. The firearm recovered in the suspect's possession is consistent with the type of firearm used in the murder of DFC Brandon Coates. Refer to Criminal Investigations report for additional information. The tactical response to this incident was terminated when there appeared to be no further information indicating additional active suspects. The crime scene was maintained and worked by the Criminal Investigations Division. On 12-09-2010, 1146 hours the crime scene and perimeter security were released by CID.

Lesson Learned

The practice of units not calling in traffic stops to the Communication Center and not being listed on the call screens should be evaluated.

In this case, the immediate evaluation of the crime scene and evidence that was present was essential in identifying a possible location and suspect. First responders should continue to balance crime scene preservation with gathering active intelligence information that can be utilized in apprehending an active shooter or at large suspect.

The agency needs to address how to best manage the data overload that occurs on the data terminals when a critical incident occurs, due to a large number of personnel logging into a call, or signing on the system to monitor what is taking place.

Actions Taken

Communications Center has established and assigned a dispatcher to monitor a TAC channel during the shift our Tactical Anti-Crime units are operational. Additionally, patrol personnel and supervisors shall review and enforce the agency's traffic enforcement policy.

The agency will continue to train on the balancing of crime scene preservation and intelligence gathering at scenes of acute crimes. No further action is required as the responding deputies performed as expected.

After Action Report

Deputy Sheriff Brandon Coates Homicide

***1414 45th street
Orlando, Florida***

December 08, 2010

Executive Summary

On the evening of December 08, 2010, Deputy First Class Brandon Coates was working as unit TAC 45 in the South Orange Blossom Trail area of Orange County, Florida. His TAC squad was conducting self-initiated law enforcement activity and operating on a talk group not monitored by the Communications Section. At approximately 2027 hours, DFC Coates conducted a traffic stop on a white pick up truck near 1414 45th Street. During the traffic stop DFC Coates was attacked and fatally shot. Numerous witnesses called 9-1-1 reporting that a deputy had been shot in the area of 45th Street and S.O.B.T. DFC Coates was located by first responders, he was treated at the scene by Orange County Fire Rescue, and transported to ORMC where he was subsequently pronounced deceased. After a thorough search the suspect Brandon L yals was later found deceased of an apparent self-inflicted gunshot wound.

Once Communications received the first of several 911 calls the dispatchers and supervisors became extremely busy attempting to deal with all the required notifications, phone calls and radio traffic. Supervisor David D'Alessandro made an immediate phone call to Manager Nancy King who then passed the information on to others in her command. Communications was fortunate in that it was a Wednesday night and consequently we had extra manpower to help handle the extra work load.

While the dispatchers were receiving and passing on critical information to the road units and surrounding agencies, the supervisors and assistant squad leaders began the process of making the necessary notifications to the Executive Staff and required sections such as HRD, Legal and PSD. As two supervisors took control of the notifications, others took control of the phones and attempted to deal with all the incoming phone calls from agency members, other agencies and the public. Supervisors soon realized that they had the wife of one TAC member job shadowing in the supervisors' pod and another wife (Comm ASL who was at home) desperate to know if their husbands were involved. Supervisors were able to determine that the husbands in question were not injured and were able to address the immediate safety concerns. Between the phone calls, notifications, personnel issues and the normal daily phone calls received, supervisors were overwhelmed and unable to listen to the radio traffic at that time.

Around 2045 hours operators noticed that their CAD commands were not being completed and they had trouble adding information to their calls. Supervisor D'Alessandro again relayed this information to Manager King as she was on her way in.

Management arrived at the Communications Center at approximately 2130 hours. Manager Nancy King was first on scene and attempted to deal with the personnel who were particularly impacted due to their relationship with either DFC Coates and/or his squad. One of the Teletype operators was directed to take the Channel 4 dispatcher to the hospital to be with the squad. Assistant Director Amy Campbell attempted to deal with the CAD issues upon her arrival, ensuring that personnel had the additional tools they needed in order to process calls while CAD was down. Manager Frank Sherrard was present and continued to check on personnel and assist where needed.

CISM team members Jennifer Fulford and Kelly DeGuzman arrived and we pointed out specific employees whom we felt might need a little extra attention based on their reaction to the shooting. Once management was informed that DFC Coates had died we personally went around to each member of communications to inform them. CISM was available but not needed at that point.

Around 2330 hours we received word from Tiburon that CAD was back up and we initiated the necessary procedures to convert back to CAD from cards. Management made arrangements to make sure that the personnel who arrived for the morning shift would be appropriately briefed regarding the shooting and subsequent death of DFC Coates. Management left the Communications Center around 0030 hours.

The Communications Section's response to this incident was severely hampered by the untimely failure of the Tiburon Computer Aided Dispatch (CAD) system and mobile computers. At the worst possible time, this made tracking, documenting and sharing critical information very difficult. Fortunately, extra personnel were on duty and helped overcome this hurdle. Additionally, the supervisory team demonstrated excellent teamwork by pulling together to manage the overwhelming workload that follows a deputy involved shooting. Notifications were made, teams were called out, audio requests were completed, etc.

| CISM: Manager | Nancy King |

Incident Overview

Communications first became aware of this incident when a 9-1-1 caller advised that a deputy had been shot and was lying on the ground by his car. Several other 9-1-1 calls with similar information soon followed. Each 9-1-1 Operator started questioning the callers for more information and transferred them to the Fire Department for a medical response. A concern was raised about the timeliness of the transfer of the 911 information and was referred for internal review. Units were dispatched to the scene. Other agencies were notified via Intercity and started to respond. Around this time dispatchers started to experience difficulty with the Computer Aided Dispatch (CAD) system and Deputies also experienced problems with their mobile computers. There was a rapid and continuous increase in manpower. Soon almost 300 responders from numerous law enforcement agencies were in the area. Suspect information was obtained by the first units on the scene and broadcast over the radio. Deputy Coates was transported to ORMC where he was pronounced deceased. After an extensive search of the area the deceased suspect was located.

(Times verified from Radio Shop Software.)

Times from Recording software (RS) Times from CAD (CAD)

12/08/10

2027 TAC45 DFC Brandon Coates initiates the 10-50. (RS)

2027 TAC41 Cpl. DeGrilla acknowledging the 10-50 with a 10-4. (RS)

2028 TAC41 Cpl. DeGrilla doing the 1st unit checks, “45 checkup”? (RS)

2028 TAC45 DFC Brandon Coates advises 10-4. (RS)
(Radio id on this transmission came up as Cpl. DeGrilla, however after research the Radio Shop verified that the “Freedom Software” was wrong, and it was DFC Coates responding with a 10-4.

2032 TAC41 Cpl. DeGrilla asking “45 checkup?” (RS)

2032 TAC50 Sgt. Kevin Meyer asking for last location. (RS)

Key Initial Call Response Times (Not all inclusive):

2033 Initial call received advising deputy sheriff shot on 45th St. (RS)

2033-2035 Multiple callers reporting deputy down in the area of 45th St. and S.O.B.T. (RS)

2035 Orange County Fire Department notified and enroute. (RS)

2035 Call verbally dispatched (RS)

2035 911 call received advising that at 5208 Via Hacienda a black male abandoned a white truck in front of that location. The truck matches the Suspect vehicle description. (Call taker treats as suspicious vehicle because she has no knowledge of the shooting). (RS)

2036 Units showed assigned in CAD. (CAD)

2036 Multiple Patrol Units responding, 10-33 (Emergency) traffic called. (RS)

2037 Unit 142 Deputy Thomas McIntosh on scene, suspects in a white truck, appears to be a TAC unit, white dodge truck is GOA. Confirmed deputy down, possible Signal 7 (deceased). (RS)

2037 Signal 43 (Officer needs assistance) put out on Intercity and OCSO talkgroups, S-43 Sector 4, Holden and OBT, Officer shot. (RS)

2037 Chase notified. (CAD) Chase and K9 told to 10-96 (change radio channel to Channel 4, K916 is 10-51 (enroute) (RS)

2038 – 2040 Multiple reports of white truck observed leaving area. (RS)

2039 First responders put out the possible suspect vehicle is a white, Chevrolet, pick up truck, 308YTD, it is a rental. (RS)

2039 Metro 5 talkgroup patched for other responding agencies. (RS)

2040 342 goes 10-97 (on scene) and advises Rescue 50 is also 10-97 (on scene) (RS)

2040 Call taker enters info regarding abandoned Vehicle at 5208 Via Hacienda into call. (CAD)

2042 Dispatcher advises we are having computer problems.(RS)

2043 Units responding and establishing and extended perimeter in the area of Via Hacienda and Huntington on the Green complexes based on Suspect information obtained from TAC 45 vehicle # 1099. (RS)

2043 Notified on Intercity that units from OPD, FHP, WPPD and Maitland PD are responding (CAD)

2044 Channel 2 Dispatcher advises computer has locked up. (RS)

2046 Update on truck put out on Intercity (description and tag) (RS)

2046 FHP asks for update on direction of travel (RS)

2049 Homicide notified of incident

2050 Dispatcher advises possible suspect veh at Via Hacienda Dr. (RS)

2050-2117 Command Staff notified of incident

2055 Estimated time of MDS crash for several minutes due to overload.

2058 Report of suspect last seen running in area of Huntington on the Green. (RS and CAD)

2059 Dispatch advises FHP of suspect's name and address (RS)

2102 Forensics notified of incident

2111 HRD notified of incident.

2116 PIO notified of incident

2121 CIMT notified of incident

2124 Report of a possible suspect located in wooded area near Huntington on the Green. Suspect is Signal 7 (deceased). Suspect matches preliminary description of Suspect information gathered from original scene. (RS on S4S talkgroup)

2226 Requested a FCIC/NCIC Transaction Archive Report (TAR) showing DFC Coates Teletype activity from FDLE.

2223 Beginning to break down and release assisting agencies personnel.

2240 Bloodhounds complete tracks, no further ongoing tactical operations regarding additional suspects.

12/09/10

1146 Crime Scene and crime scene security is released per CID.

1146 End of operations.

Units Involved / Staffing Allocation:

1. OCSO Resources – 280 sworn personnel identified not all inclusive.
 – 68 Communications personnel
 2. Other Agency Resources – 116 personnel identified not all inclusive.
 3. Assisting Agencies Involved - 10
- Apopka PD
 Belle Isle PD
 Eatonville PD
 Edgewood PD
 Florida Highway Patrol
 Maitland PD
- Ocoee PD
Orlando PD
 Winter Garden PD
- Winter Park

LessonS Learned

Providing 9-1-1 Operators and Dispatchers with more scenario based training and drills could help them cope with critical incidents of this type and result in a more consistent response.

The Tiburon Computer Aided Dispatch (CAD) system failed apparently because of a sudden increase in mobile computer traffic related to the response to this incident. 9-1-1 Operators and Dispatchers depend upon CAD, Deputies rely on their mobile computers. Critical system failures must be avoided. The agency should work with Tiburon to prevent this from happening again.

Communications should develop protocols to manage the impact on staff. TVs normally tuned to news channels should be turned off. Employees personally affected because of relationships etc should be identified and triaged away from the work area.

News of the deputy shooting spread like rapidly. Communications received numerous calls from inside and outside the agency asking for the name and status of the shot deputy. Communications should refer all media inquiries to the PIO and refer all internal inquiries to the chain of command. Agency personnel should be told to refrain from calling Communications during an incident of this type.

Actions Taken

The Communications Section's management team is in the process of developing and implementing additional scenario training for 911 operators, specifically for emergencies involving agency personnel. Training is also being developed for the Communications Center to implement ICS protocols specific to their required tasks during critical incidents. Updates on the implementation of the training will be provided at intervals directed by the division command.

Direction has been given that televisions will not be turned on during critical incidents.

As part of the implementation of ICS at the Communications Center, during critical incidents, a person will be tasked with personnel evaluation for employees that may need immediate relief.

Communications supervisors have been directed to refer all media or extra-agency inquiries to the PIO and agency employees to their respective chain of command for information during a critical incident. This task will be delegated as part of the ICS protocols.

A review of the transfer of 911 calls to dispatch has been conducted.

IMS is addressing the software flaw that caused the CAD server to stop processing. See the IMS portion of this report for details.

IMS Section

After Action Report

Deputy First Class Brandon Coates Homicide

***1414 45th Street
Orlando, Florida***

December 08, 2010

Executive Summary

It was determined that the outage was caused by three separate CAD server events which were all related to the Deputy Brandon Coates incident. The primary contributing factor was a problem with the way the Tiburon software handled messages from the CAD server to the Mobile Comm units that were assigned as backup units to the call. A secondary factor was deputies not assigned to the call viewing the call notes on their Mobile Comm. The third contributing factor was a flood of deputies that were not logged on the Mobile Comm, logging on to view the call notes. These three actions combined caused an overload on the system which could only be resolved by restarting the Tiburon application.

Lessons Learned

There is a flaw in the Tiburon software.

We need to eliminate the other two mitigating factors, but still provide means for the deputies to view calls for service call notes

We need to verify that the CAD server has kept up with agency growth and is able to handle the workload appropriately.

Planned Improvements

Tiburon has already taken temporary steps to prevent an overload of the system with CAD backup messages to units assigned to a call as a backup. This temporary fix is in testing and once proven to work properly will be in place until a permanent solution has been developed.

Tiburon has identified the flaw in their software and has started making the necessary changes to correct the problem. Tiburon has told us they expect a very quick completion.

IMS has started talks with Tiburon to pull the call notes from the CAD system and place them on a separate server. This will allow IMS to develop a separate application that will allow Deputies to view dispatch notes for active calls for service, without logging on the Mobile Comm. This will eliminate the need for the Deputies to view these notes in the Mobile Comm and/or log on to their Mobile Comm and thus eliminate that extra load on the CAD server.

IMS is in the process of setting up system monitoring on the CAD server to measure the load on that server. If these results indicate the server load is beyond 25% capacity during a normal work day, IMS will replace the server with a unit that is properly sized for the workload.

Actions Taken

The temporary patch tested with no issues and has been installed on the production server. The patch worked well during the barricaded suspect call last month at Colonial Dr. (Hwy. 50) and Pine Hills Road.

Tiburon has modified their software so messages sent to backup units no longer will consume the server resources as it did on December 8, 2010. This change has been applied to the test environment and will be tested extensively before it is moved to production.

Tiburon has been made aware of the importance of providing call notes for use off the CAD server. IMS will continue to work with Tiburon; however this will take some time to complete due to the technical problems associated with this change.

The audit of CAD server indicated that the CAD server is operating, on average, at 60% of its capacity. IMS is working with an IBM provider and Tiburon to replace the server with a unit that will allow us to reduce that usage, on average, to under 50%.

CBT/CISM

After Action Report

Deputy First Class Brandon Coates Homicide

***1414 45th Street
Orlando, Florida***

December 08, 2010

Executive Summary

On December 8, 2010, Deputy First Class Brandon Coates initiated a traffic stop in performance of his duties. Deputy First Class Coates was subsequently shot and killed during this traffic stop. Investigators of the Criminal Investigations Division responded to investigate the homicide of Deputy First Class Coates as well as to identify and apprehend the suspect.

The investigation was successful as Investigators were positively able to identify Brandon Lyals as the person responsible for killing Deputy First Class Coates. The investigation revealed indisputable evidence linking Lyals to the crime scene. The investigation also revealed that Brandon Lyals acted alone and subsequently committed suicide.

The Criminal Investigations Division responded with approximately forty-nine (49) Detectives and four (4) Crimes Scene Investigators. This manpower was on scene within a half hour of Deputy First Class Coates being shot. The quick and large response by the detectives enabled intelligence to be obtained quickly, and the identity and number of suspects was established in a timely manner.

The Criminal Investigations Division's response could have been more organized if the Incident Command System had been utilized. A separate Criminal Investigations Division Command Post would have made it a central depository for investigative results as well as a better way to keep track of investigative efforts.

On December 8, 2010 at approximately 2040 hours, Captain Mike Osborne contacted Lieutenant Paul Zambouros via telephone and told him a deputy had been shot and was seriously injured. Lieutenant Zambouros began to monitor the radio channel as he prepared to respond to the scene. It was evident from the radio traffic that the suspect was at large. Lieutenant Zambouros contacted Homicide Squad Sergeant Dan Gutierrez and requested that the shooting team respond to the scene.

The Homicide Squad responded to the crime scene located behind Orange Blossom Center at 45th Street and Nashville Avenue. Homicide Detective Chris Williams was designated as the lead investigator. Captain Mike Osborne and Sergeant Gutierrez arrived and began to oversee the investigative operations. Prior to arriving at the shooting scene, Lieutenant Zambouros responded to the Orlando Regional Hospital to establish evidence control and to ascertain the condition of Deputy First Class Coates. After Deputy First Class Coates was pronounced deceased, Lieutenant Zambouros began the Medical Examiner notification and response process, and documented the notification of the next of kin.

At approximately 2103 hours, a unit reported hearing a single gun shot from behind a wall along the wood line of the Huntington on the Greens apartment complex. A body of a deceased African American male was located by patrol in the area where the shot was heard. It appeared that the deceased male shot himself in the head. A pickup truck matching the description of the one Deputy First Class Coates had pulled over was located in the vicinity. A witness stated he observed a black male remove his coat and jewelry before running into the apartment complex where the deceased black male was located.

At this point, the Homicide Squad was trying to establish with certainty the number of suspects, the identity of any suspects and if the deceased African American male at the Huntington on the Greens apartment complex was related to Deputy First Class Coates' murder. Therefore, three (3) crime scenes were identified, 45th Street and Nashville Avenue, the location of the deceased African American male, and for a time the Orlando Regional Medical Center. Homicide Detective Jerold White and his partner, Detective Mike Erickson, assumed the lead investigator role at the scene of the deceased African American male. Forensics Crime Scene Investigators Amanda Cartwright and Sarah Koerber responded to that location to assist Detectives White and Erickson. Forensics Crime Scene Investigators Mike Vincent and Gerardo Bloise responded to assist Detective Chris Williams. There was no need for a Forensics Squad response to the Orlando Regional Medical Center.

At approximately 2100 hours, the remaining Homicide Detectives began to track down the various 9-1-1 callers to obtain any additional information these callers may have had and obtain sworn statements.

During one of the interviews with a 9-1-1 caller, the witness advised he saw two (2) subjects standing over Deputy First Class Coates's body prior to them jumping into a white vehicle. At that time it was believed that there were two (2) people in the suspect vehicle. However, further investigation by Homicide Detectives revealed that other 9-1-1 callers observed these two (2) subjects arrive after Deputy First Class Coates was already shot and on the ground. Another 9-1-1 caller was able to verify that there appeared to be only one (1) person in the pickup truck that Deputy Coates had pulled over and that subject and the pickup truck were gone prior to the two (2) subjects observed in the white car arrived.

At approximately 2100 hours, other components of the Criminal Investigations Division began to arrive. Members of the Sex Crimes Squad, Persons Crimes Squad, Robbery Squad, Domestic Crimes Squad and the Felony Squad arrived and congregated in the vicinity of the Patrol Command Post which was located just east of 45th Street and Nashville Avenue. At the direction of Detective Williams, these additional detectives were utilized for area canvasses and to canvass area businesses and homes to seek possible security camera videos. It should be noted that there was no one assigned to scribe investigative assignments and/or results.

A driver's license and vehicle registration was found near Deputy First Class Coates' body. The Florida driver's license was in the name of Brandon Lyals. Assuming that Brandon Lyals was the subject Deputy First Class Coates had encountered, the Felony Squad began to search various data bases to find information about Brandon Lyals. They discovered information on an associate of Brandon Lyals identified as Ray Thomas. Homicide Detectives traveled to Kissimmee, Florida in an attempt to contact Mr. Thomas. Mr. Thomas was not at home at that time but contact was made with him the following day. Homicide Detectives were able to confirm that Mr. Thomas was in attendance at a technical school at the time of the shooting.

Detectives White and Erickson identified the deceased African American male as Brandon Lyals based on a comparison to his driver's license photograph. His identity was confirmed through fingerprints at a later time. Sex Crimes Sergeant Rich Mankewich was sent to the scene to coordinate information with investigators working the crime scene where Deputy First Class Coates was shot. Evidence found at the scene of Brandon Lyals' death linked Lyals to the death of Deputy First Class Coates. Brandon Lyals' death was determined to be a suicide by the Medical Examiner's Office.

During the following days, Detective Williams scoured over audio tapes of the TAC channel in an effort to determine when Deputy First Class Coates may have been shot and/or any other pertinent information. Detective Williams became aware of a software program called Freedom utilized by the Communications Center that enabled him to dissect radio traffic into individual wave files. This enabled Detective Williams to ascertain that Deputy First Class Coates was checked by his Corporal Sean Degrilla via radio at 20:28:44 and Deputy Coates responded with a "10-4" at 20:28:47. Deputy First Class Coates was checked again by Corporal Degrilla at 20:32:29 and there was no response. Without the Freedom program, Deputy Coates' response to the first unit check would not have been discovered because it was inaudible in real time listening. It was only by Detective Williams actually taking Deputy First Class Coates' radio to the radio shop that he was able to identify Deputy Coates' radio identifier as responding to the first unit check.

Homicide Detectives continued the follow up investigation to include attending the autopsy of Deputy First Class Coates and Brandon Lyals, interviewing associates and family members of Lyals, along with interviews with Deputy First Class Coates' squad mates. The investigation concluded that Brandon Lyals acted alone when he shot and killed Deputy First Class Brandon Coates. Brandon Lyals then took his own life by suicide.

Lessons Learned

The goal of the Criminal Investigations division was to identify and apprehend all of the suspects responsible for the murder of Deputy First Class Coates. This goal was achieved as investigators were able to prove forensically that Brandon Lyals was solely responsible for Deputy First Class Coates' murder, and apprehension was equated with Brandon Lyals' suicide.

Operational Strengths

The Criminal Investigations Division was able to produce more than enough investigative man power in a very short period of time. The three identified crime scenes were easily managed, and intelligence was gained quickly due to the amount of investigators completing investigative assignments simultaneously.

Areas of Needed Improvement

The Criminal Investigations Division component of this incident did not designate specific follow-up investigative tasks utilizing the Incident Command System (ICS) structure. The flow of information back to the Investigative Command Post could have been more effective.

Planned Improvement

Managers of the Criminal Investigations Division have met and discussed ensuring the use of the Incident command System in all large scale investigations. Major McKinley is in the process of upgrading the Lieutenant's vehicles with watch command and style equipment so that these vehicles can be used as mobile command posts in the future.

Incident Command System training has been scheduled for all Criminal Investigations Division personnel.

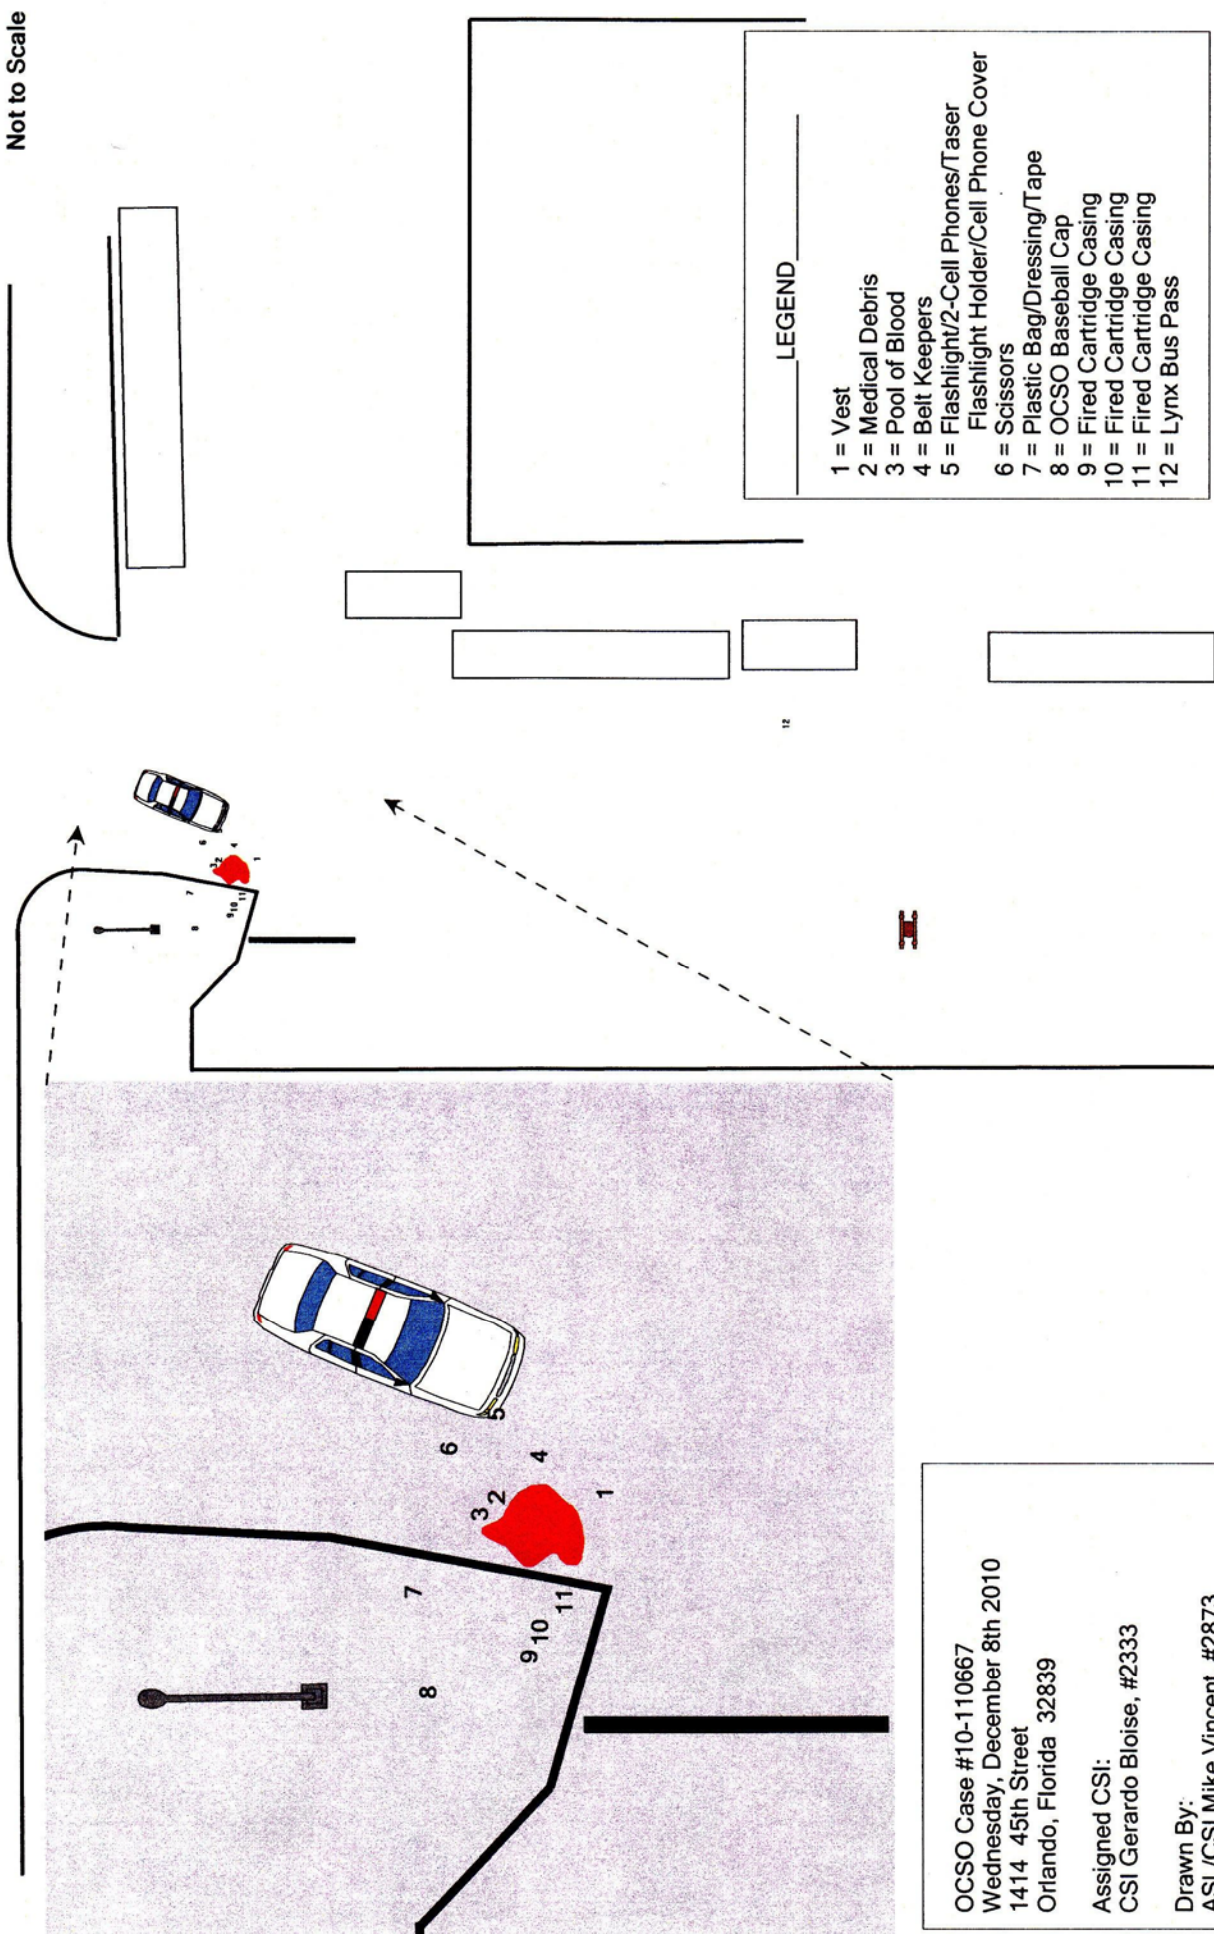

Actions Taken

Sworn personnel within the Criminal Investigations Division attended Incident Command System training on March 1, 2011.

ICS packages have arrived and have been distributed to all Lieutenants within the Criminal Investigations Division, which will allow them to set up a C.I.D. Command and Post during critical events.

After Action Report

Deputy First Class Brandon Coates Homicide

***1414 45th Street
Orlando, Florida***

December 08, 2010

Executive Summary

On December 8th 2010, OCSO Media Relations was called to the scene of DFC Brandon Coates murder to direct information dissemination to both local and statewide media. The on-call Public Information Officer (PIO) was notified and set their internal notification process in motion. Within a short time the entire PIO team was activated and the external communication process set in motion.

In this incident three scenes called for three PIO's, each one communicating with the other and speaking with one voice (one person only from the PIO team in order to maintain accuracy of information).

Media Overview

Jeff Williamson, the on call PIO received a timely callout notification from the Communications Center regarding a deputy who had been shot and was possibly deceased. Williamson informed Captain Angelo Nieves who began the chain of command notification process.

Captain Nieves notified Chief Cox and Capt. Nieves responded to the initial Crime Scene at 45th & Nashville. There he received a coordinated briefing from Capt. M. Osborne and Major R. Stucker and received the notification of a second operational scene; necessitating PIO deployment at both operational scenes and hospital.

Jeff Williamson at Scene 1, the Initial Shooting crime scene and the On-Call PIO,

This being the most active immediate scene, Williamson maintained direct and constant interaction with the media staging point for accurate and timely information.

Susan Soto at the 2nd scene, Texas and Americana, reported her presence and gathered pertinent information from the HRIC and Undersheriff.

This was the operational scene for the ongoing search for suspect Lyals, who had been spotted fleeing from the suspect vehicle.

Jim Solomons was tasked with data collection and computer mailings and updates from a static location.

Tasked to handle e-mailings as deemed appropriate, including - information gathering efforts on the Deputy involved, such as personnel history that would assist in a media briefing. Solomons updated the news desks with information on multiple media gathering points and briefing times. He also researched suspect history and photo for dissemination when needed and verified.

The Media Staging location

Initial location at 45th and Orange Blossom Trail was placed as best as could be expected by patrol allowing visibility of police investigative efforts via boom camera, yet far enough back to not pose any disturbance to investigators ground efforts or conversations.

Hospital Coordination

Chief K. Cox among other responsibilities assisted at the hospital regarding media needs and liaison with Sheriff until Captain Nieves arrived.

At the originating scene an on camera interview was not granted until all of the proper Staff, Chief and Sheriff were notified of the PIO intentions and specificity of content of the information being discussed such as involved victim deputy, suspect(s), search efforts, and activity within the second crime scene until verified and communicated to Sheriff.

PIO Williamson and Cpl. Susan Soto closed out their assignments at the operational locations and responded to the hospital to coordinate/assist with any media needs, which were self-evident. Overall the PIO requests from the investigative team, from a PIO standpoint were met without any complaints or hesitation for interaction. Information flow at the scene and via cell phone coordination was timely and on-point. The information given to media was timely as it notified the community of police action, suspect search, ongoing investigative effort, and outreach for witness information, and deputy condition.

The Sheriff's final announcement/media interview was conducted during the early morning hours and the minor after hours feeds of information were provided by the PIO on scene until approximately 3am.

During the evolving tragedy we were bombarded (expected) with questions, but did not have then or after any media complaints regarding accessibility at the scene (staging locations), or availability of PIO Staff.

Lessons Learned

PIO responded quickly and accurately to media inquiries regarding this shooting. It was also our goal to liaison with investigators regarding what information to disseminate and when to do so; this was successfully accomplished on scene.

There were multiple operational briefings taking place as needed at one time, difficult to know which briefing to attend.

Planned Improvement

The PIO assigned to any scene will scribe information of a PIO need and provide a verbal update and e-mail update with timelines to PIO in charge, for internal use and recordkeeping needs.

Actions Taken

PIO personnel have been briefed that when responding to high risk incidents they are required to submit a timeline of media briefings and overview of information released.

Orange County Sheriff's Office

Support Services Section

CBT/CISM

After Action Report

Deputy First Class Brandon Coates Homicide

***1414 45th Street
Orlando, Florida***

December 08, 2010

Executive Summary

On the evening of December 8, 2010, the CISM Team Command, Captain Laurie Helgren and Ms. Patti Broderick, responded to the hospital for an initial assessment of the first responders, affected non-first responders and affected General Staff. CISM Team Members responded to the Communications Center to assess and assist on-duty Communications Center personnel. The TAC Unit met off-site in an informal setting to allow the CISM Team Command to offer coping strategies while TAC Unit Command and briefed all on the circumstances of Brandon's death.

A formal debriefing for first responders was held on Sunday, December 12, 2010 with a Licensed Mental Health Provider, CISM Team Command and Team Members. This debriefing was completed utilizing the ICSF Mitchell Model, which is a universally accepted practice model for critical incidents. Additionally Uniform Patrol Division Sector 3 A-Side personnel were debriefed by the Division Commander, Captain, Lieutenant and CISM Co-Commander. A follow-up session with CISM Command and Team Members and all Communications Center personnel on-duty at the time of Brandon's death was held to again assess and assist with any compelling issues. Further follow-up with Licensed Mental Health Professionals were and are ongoing as of this date. CISM Staff attended Brandon's viewing and funeral in order to continually assess the affected personnel. CISM Command and Team Members spent approximately and collectively 40 hours of "face time" with affected personnel. CISM Command worked an additional 10-14 hours with administrative matters for these meetings/briefings/sessions.

Orange County Sheriff's Office Chaplains also responded to the hospital, but were not sent to the Communications Center, Command Post, Central Operations, or Sector 3. They were involved with the funeral and available for any follow up if requested.

Lessons Learned

Better communications and process regarding the notification to the family.

Maintain ICS format of the operation and improve communications and follow-up for all aspects of the team.

Develop a file of businesses that are willing to provide resources during a line-of-duty death and have that list available to the staff for resource allocation.

Involve the employees chain of command (Lieutenant or above) in the process to assist the lead CAO with personnel management and the funeral events.

The incident represented the worst case scenario for a line of duty death and it affected the entire agency.

To continually assess personnel at the scene, those responding to the hospital and other locations where personnel are gathered during and after the event, to include days, weeks and months after the incident.

Other CISM Team members needed to be called out to assist.

CISM Command had too many other roles and needed to communicate more effectively.

Grief Counselors should have been summoned and sent to all Sectors, Sections, Units, etc.

Chaplain Liaison needs to follow protocol and make sure Chaplains are sent to areas where agency personnel may benefit from their assistance.

CISM, HRD, EAP, CBT, CAO and Chaplains need to communicate.

Planned Improvements

Identify all names of personnel who will fill a specific role on the Casualty Benefits Team and train all assigned personnel for their role.

Develop a list of businesses that are willing to provide resources before they are needed.

Train agency personnel during orientation and in annual supervisors training on CBT related issues.

Work with Homeland Security to develop a Casualty Benefits Operational Guide.

Coordinate with HRD, Training and Sectors to conduct orientations regarding CISM, CAO, CBT and Chaplains.

Prepare Power Point and post on Portal for everyone's benefit.

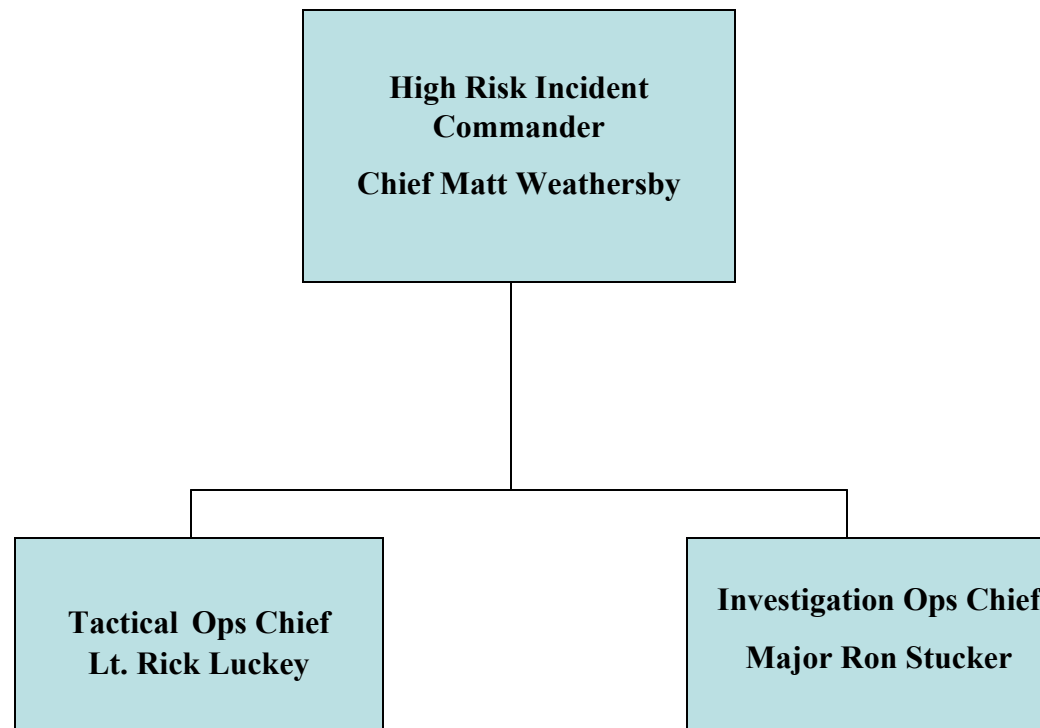

Make sure we follow protocols established to better respond to a traumatic event involving agency personnel and therefore assist immediately those who need help coping with a tragic issue.

Actions Taken

A one (1) week Florida Attorney General's Office Crisis Response training course is scheduled in July 2011 for all CIT, CAO, CBT and CISM personnel. Communications Center personnel will be invited to attend.

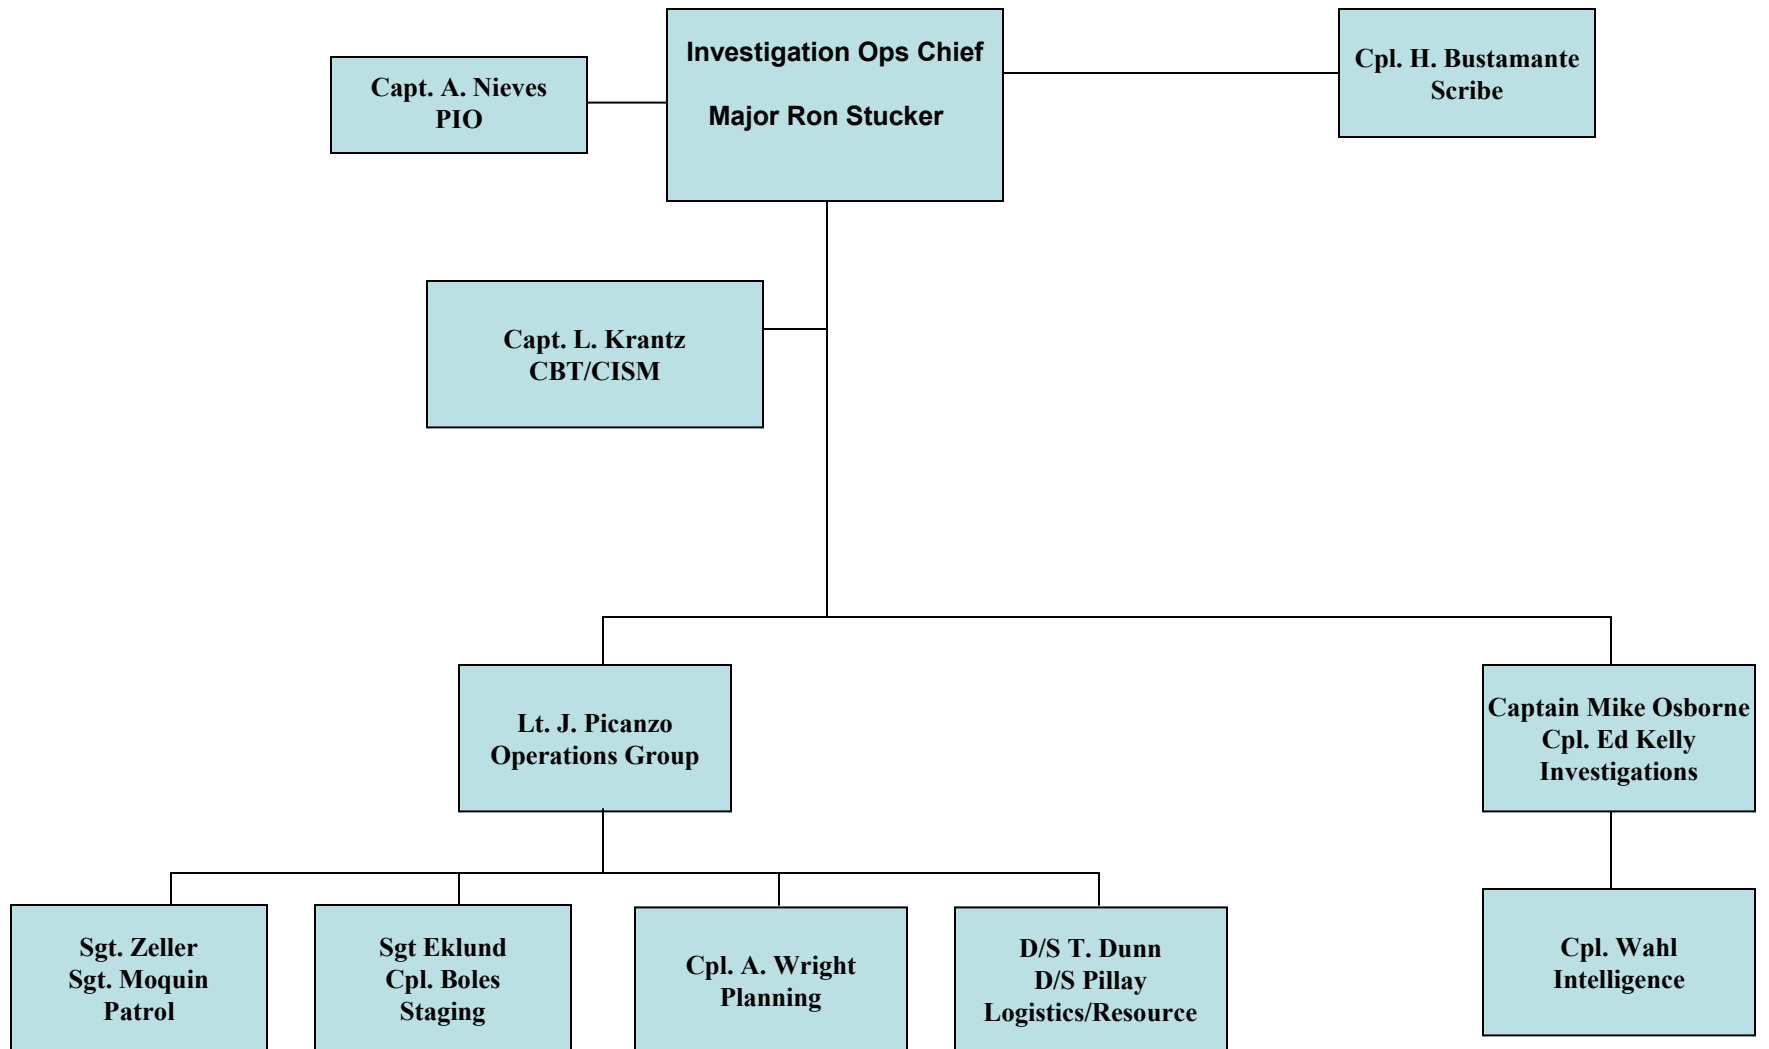

Made contact with Patrol Sector Captains and offered to conduct presentations during briefing regarding the role of CBT, CAO, CISM, CIT, Advocate Services and the Chaplain program.

Incident Command System

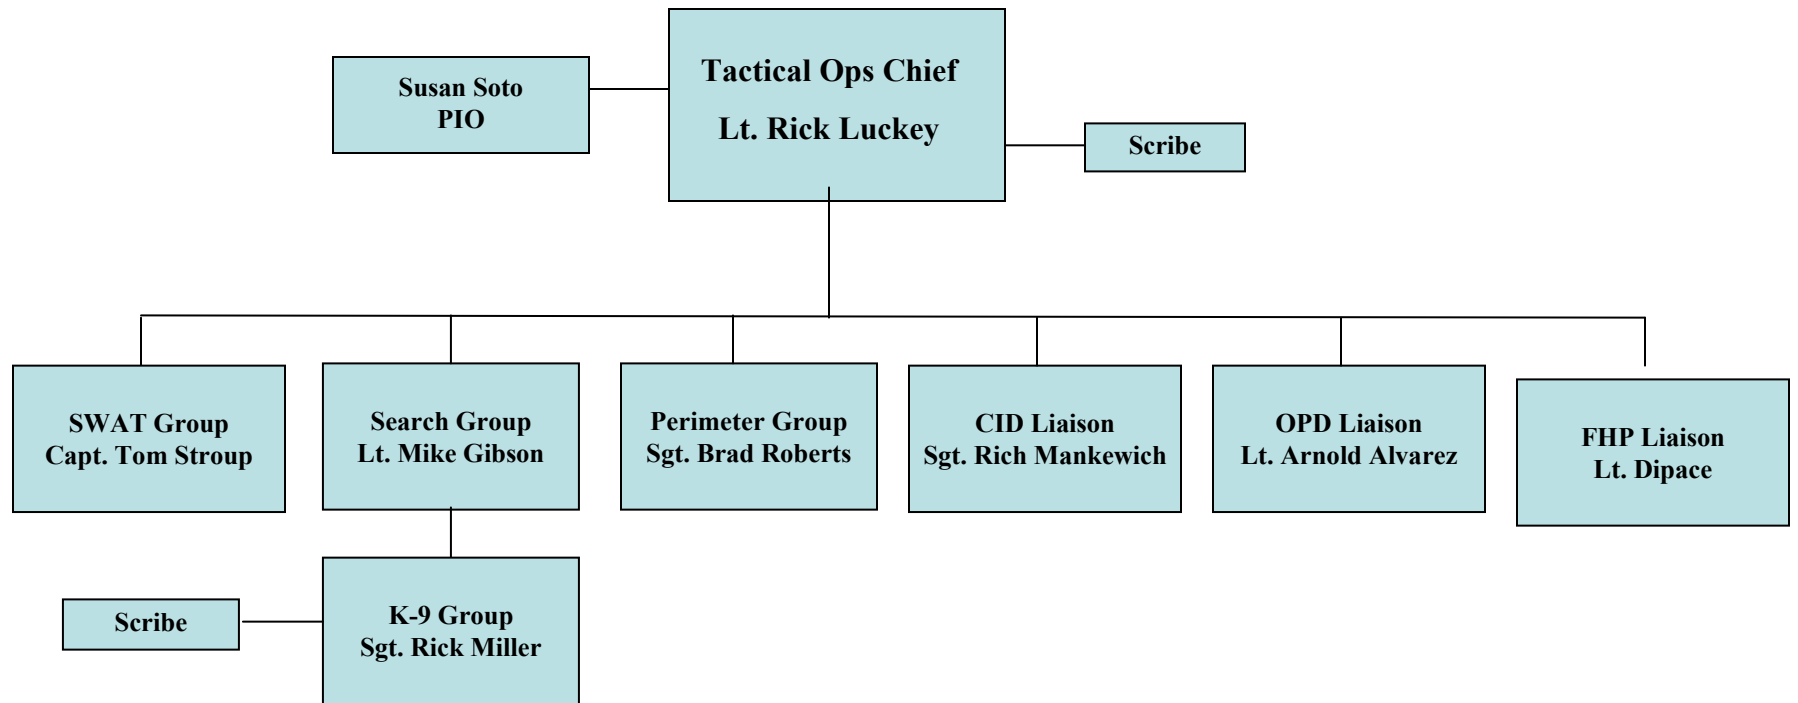

* The ICS Organizational Chart was developed over the course of the event and is shown in its final version.
